

### **What are acceptable materials for construction?**

A fence may be constructed of wood, wire, brick, or other similar materials.

Vehicle tires and sheet metal *may not* be used as fencing material.

Electric fences are *prohibited* on residential properties, and are only permitted on agricultural properties for the purpose of controlling livestock.

Barbed wire fences are also *prohibited* on residential properties and are only permitted on agricultural, industrial or wilderness zones for the purpose of certain projects.
